REPORT OF THE KINGSTON FIRE DEPARTMENT

For the Year 1933

The department has responded to 23 calls, three of which have been out of town.

We have purchased 250 feet of 2½ inch hose and 250 feet of 1½ inch hose to replace that which is no longer fit for service. We would like to recommend at this time that the town purchase 300 feet of 2½ inch hose to take the place of that which is no longer fit for use.

The schools, churches and firemen united and held a Community Christmas Tree this year.

From the treasury of the department \$211.43 was paid out for accessories and \$50.00 for the Christmas tree.

We wish to express our appreciation for the co-operation given.

GEORGE B. STEVENS,

Chief.

SCHOOL BOARD REPORT

WELFARE OF OUR CHILDREN

During the recent cold spell, many of our inadequacies came to mind. We think back upon the school plants of other years and wonder how the children survived the intense cold. Records would seem to indicate that the attendance was not good and that the loss due to illness was considerable. Then we ponder the changes made during the past few years. We marvel at the wonders that have been wrought but still look with apprehension on what is and what should be. To be sure, our buildings have been improved and better heating arrangements installed. Even so, the room temperatures could not be lifted to comfortable margins. The loss of schooling due to closing a day here and there and due to illness on the part of the pupils and teachers is no small item.

Fellow citizens, we believe it is not just and that the time for improvements is at hand. We are firm in our opinion that the best interests of our future generation demand action now. We cannot expect to preserve the vigor of our present generation for future's use by continuing our present policies. We must see that they are housed in adequate quarters at least as comfortable as our average houses in town.

Large sums of money have been spent to add more useful equipment and more attractive surroundings. Yet we still can see but little gain. The fact remains that we have not much left to look upon with pride. Yet large sums are necessary to provide a livable atmosphere for the proper management and operation of school work.

What are the alternatives? The best and wisest solution appears to be the construction of a modern building with all the modern conveniences for healthful living. The other is to employ a rather large sum of money to make repairs and changes on the present buildings to bring about the desired results. Articles on which you are to make your choice have been included in the School Warrant. Our recommendation would be to adopt the first alternative mentioned just above.

Would the cost be prohibitive? Our present local costs for the elementary schools are not great as you will see by comparison made in the Superintendent's report. Hard times have been with us for some period now but definite evidences are seen for improvement in condition. The added burden to the tax rate would not come immediately, but in two years, when it is quite safe to make predictions that business will be better and far out on the road to complete recovery. Then we will all be better able to stand any additional tax requirements. If we are ever going to improve our facilities it would indeed, seem wise to do so now before any further rise in building prices takes place. Therefore, the cost is not beyond our means.

WHO PAYS FOR THE EDUCATION OF OUR YOUTH?

To be sure, the under-privileged pays a large sum and gets a larger amount in return in the form of better developed children. These parents could never afford to give their youngsters such advantages under private auspices. These people are much interested in education because it yields them such a large return on their investment. We must also bear in mind that they are standing the burden of the cost of bringing up a child, estimated at several hundred dollars during the school period. The wealthy are likewise interested in schools because of the protection and support they receive to their property and business. They could not hope to train people for their business as cheaply as their proportion in taxes does. The childless parent knows the value of educa-

tion of other people's children as a help to himself in all his dealings. The last has only his share of taxes to pay and probably this would not amount to as much in the course of fifteen years as would accrue to the parent with a child. So, certainly every group, the wealthy, the poor, the business people, the parent with a child, and the childless parent are interested in the best that education has to offer. All our great leaders say that education is the safeguard to democracy. Its extension and preservation is essential.

A new school plant is the remedy to our situation. We take this opportunity to present the proposition to you, knowing full well your willingness to carefully weigh the facts and to formulate a fair decision. This report offers us a convenient method to make known to every citizen, and in a brief way, just what we recommend. Drawings have been submitted to us for a new central school to cost about \$29,000 with additional expenses of \$4500 for fees, land and equipment. The total cost then amounts to \$33,500. We anticipate an income to partially offset, of \$10,500 from government grant, sale of property, and surplus fund. Therefore, a sum of \$23,000 should suffice to raise by issue of bonds. The payment of these bonds does not begin until the end of the second year.

With a second year coming probably in 1936 the increase to the tax rate would amount to about \$2.80 per thousand, less 85c saved in present operation expense, or a net of \$1.95 per \$1000. Every year would make a smaller net due to decrease in interest charges until at the tenth year the net would amount to approximately \$1.45 and going down to something like \$1.00 at the twentieth year. For the whole twenty years required to pay the bond issue, the average amount due each year would approximate \$1.45 on every \$1,000 valuation.

Yet another advantage comes to mind, namely that of possible employment to many of our own citizens now engaged in C. W. A. projects, who might be unemployed when the C. W. A. is terminated within a few weeks. If we can

furnish them with profitable employment right at home and upon the construction of a project which would mean so much to them and their families, then our proposition assumes added value.

We have presented to you our recommendations and trust that you will give them a fair hearing, the attention that they deserve. You have always been very public-spirited and considerate. We ask your indulgence and opinions on the great issue. Let us go to the March meeting with a firm resolution that we will do the right thing and put our beautiful town on the map as one of the most progressive and forward-reaching towns in the old Granite State.

Very faithfully,

SCHOOL BOARD OF KINGSTON,

ANDREW CHRISTIE (*Chairman*).

SUPERINTENDENT'S REPORT

To the School Board and Citizens of Kingston:

I herewith submit my seventh annual report. Your consideration of the following topics is solicited:

OUR OBJECTIVES

Amidst the most trying period in our Nation's history, I make bold to declare our objectives in education. It should be of interest to you that your schools are endeavoring to reach the goals now common to the educational world and that definite progress is being accomplished.

Some of the objectives follow:

1. To perfect the education of the whole child.
2. To create an interest in the child in his inschool and out activities so that he may be a useful citizen all his life.
3. To bring about an interest on the part of parents in the modern program so that better understanding of the school may be had.
4. To release some of the traditional, inefficient methods of instruction so that better methods may result in increased knowledge and power.

Our program deals not only with the mental but as well with the physical and social side of the child. Much individual attention has brought about desirable gains in the mental. Directed and supervised group activities in play and dramatizations have attained the results needed for physical and social development. Our children must learn cooperation and self control in order to meet the demands of society. These are probably best taught through *play and games. I hope our schools are meeting this problem.

More and more interest in current affairs is being manifested in our children. They are eager and anxious to know

the workings of our government and society. Our upper grades promote lively discussions of these topics in almost every school day.

Parents are keen to help and often consult the teachers to know the best ways to help their children. They are ready to co-operate and promote educational welfare. I cannot commend too highly the effectiveness of the Parent and Teacher movement. We hope for still greater emphasis in this respect.

Many subjects formerly conducted as elaborate memory tests have now been succeeded by planned adjustments to fit the individual needs of the child. We have come to realize that every child has a definite need and that not everyone can be pushed through the same "mill."

Each pupil has a certain mental capacity. Our aim is to reach his maximum and not beyond his power of accomplishment.

In attaining these aims and objectives, an enthusiastic and well trained teaching staff is essential. When once obtained, every inducement toward retention should be offered.

THE EDUCATIONAL CRISIS

There is an educational crisis. Thousands of our nation's children are now deprived of even the rudiments of an education. School terms have been shortened from one week to six months in many states and communities. Some schools expect to operate only three months of the year. Teachers' salaries have dropped to new lows—even lower than the minimums allowed to unskilled workers under the codes. Our nation's schools are faced with more children and less money. Never has it been so difficult to meet these demands.

But what has this to do with our local situation? Much, in that modern means of communication have made us a whole rather than a group of separate communities. That which effects one part has a depressing effect upon the rest. We of New Hampshire have been extremely fortunate because we

have succeeded in continuing our schools without very severe retrenchments. I hope it may be our ambition to keep our present establishments intact from harmful influences. Further retrenchments may be necessary but let us examine the essentials and make sure that first things come first.

SCHOOL COSTS

The above discussion leads naturally into local costs and some comparisons with those of your neighbors. Please remember that these are offered only in a spirit of helpfulness that you may from them draw your own conclusions. Changes in number of pupils have a decided influence upon the averages, especially in the smaller districts. All the figures used are from the most recent releases of the State Board of Educations.

DISTRICT	No. Elm Pupils	Per Pupil 1932-33	Cost State Aid Per Pupil	Net to District
Brentwood	120	58.30	19.47	38.93
Danville	85	58.30	19.36	39.16
East Kingston	37	110.90	26.17	84.73
Epping	364	48.70	14.58	34.12
Fremont	110	63.25	12.11	51.14
Kingston	163	68.32	19.56	48.76
Sandown	50	73.65	28.79	44.86
South Hampton	31	117.46	34.90	82.56
(State Median)		75.89		

PERSONNEL

Again it is my privilege to remind you of the retention of the same capable staff of teachers. I am sure it speaks well of their ability as well as the desirability of their positions in your midst. The increase in pupils is not alarming but gradual growth. Your several graduates are maintaining high averages in high school. Attendance should make a nearer

approach to the state average if parents and teachers will add a little extra effort to this feature.

IMPROVEMENTS

The West Kingston, Patten and Plain Schools were improved by interior painting last summer. All desks and other furniture were varnished—indeed a valuable item in the preservation of equipment receiving as much use as does school furniture. The installation of sanitary toilets at the Patten School has been of practical value in the promotion of good health as well as good habits.

Projects for the completion of floors in three schools have been suggested—the present floors being well worn and literally supplied with large cracks and protruding knots. For sanitary reasons alone they should be replaced.

APPRECIATION

Anything which may be done to evaluate the work of the schools might lead to disastrous results. I am deeply grateful to the many parents and citizens who have so faithfully helped in interpreting the schools to the general public. They have given freely of their time and ability. To the School Board and teachers, I would especially be grateful for their co-operative efforts for without them I would not be able to report a successful year notwithstanding the most restless in recent history.

Respectfully submitted,

HAROLD C. BOWLEY,

Superintendent of Schools.
